The facilities are expected to be ready for occupancy by DHCD's more than 300 employees by 2015. This will be the first state agency to be headquartered in Prince George's County.

Mayor Hanko, the City Council and the Administration are very excited and welcome the (DHCD) development project—*First State Agency to be Headquartered in Prince George's County.*

MAYOR'S MESSAGE

Mayor Andrew C. Hanko, proclaimed April 2, 2014 as

ARBOR DAY

In the City of New Carrollton, and stated the following: I urge all citizens to celebrate Arbor Day and to support efforts to protect our trees and woodlands,

FURTHER, I urge all citizens to plant and care for trees to gladden the heart and promote the well-being of this and future generations.

- In 1872, J. Sterling Morton proposed to the Nebraska Board of Agriculture that a special day be set aside for the planting of trees; and the holiday, called Arbor Day, was first observed with the planting of more than a million trees in Nebraska.
- Arbor Day is now observed throughout the nation and the world.
- Trees can reduce the erosion of our precious topsoil by wind and water, lower our heating and cooling costs, moderate the temperature, clean the air, produce oxygen and provide habitat for wildlife.
- Trees are a renewable resource giving us paper, wood for our homes, fuel for our fires and countless other wood products.
- Trees in our City increase property values, enhance the economic vitality of business areas, and beautify our economy.
- Trees, wherever they are planted, are a source of joy and spiritual renewal.

New Carrollton is reminding residents of a new County law that went into effect on January 1, 2014 prohibiting the use of plastic bags for yard waste. In accordance with the County law, residents who bag their yard waste must put the yard waste out for pickup in paper bags or reusable containers with sturdy handles and tight-fitting lids that are marked "YARD WASTE." All other collection requirements will stay the same.

Source Reduction Tips

Grass Cycle: Use a mulching mower to finely shred your mowed grass and leave it on the lawn. Start a backyard compost pile.

CITY OF NEW CARROLLTON, MARYLAND

DEPARTMENT OF CODE ENFORCEMENT

New Carrollton Code Enforcement Department is located in the same office with the City's Administration.

The Code Enforcement Department responds to concerns from citizens that affect the quality of life within the City such as zoning, overgrown lots or yards, inoperative vehicles, maintenance of structures, illegal signs and public nuisances. Systematic inspections are also performed throughout the City to ensure properties are in compliance with City code.

Swimming Pools:

For millions of Americans, swimming pools are great places for families to spend time together and have fun. Yet it's important to ensure everyone stays safe in and around pools.

All swimming pools, containing more than 24 inches (610mm) of water, are required by law to be completely enclosed by a fence or barrier at least six feet high. This includes large size molded plastic, or inflatable "baby pools" that contain water levels in excess of the code requirements. All gates and doors to enclosures must be self-closing and self-latching, and never prop open a gate or entrance. Additionally, stay out of pools during severe weather and thunderstorms, especially if lightning is forecast or present.

As a lasting tribute, a scholarship will be awarded annually in her name to deserving youths of the City. This year the Committee will award \$2,000.00 in scholarships.

Thank You! For promptly picking up after your dog to keep our waterways clean!

Dog waste is not a fertilizer!

Picking up after your dog goes further than making your neighbors happy. when you are out walking your dog, it is your duty to collect their waste. the trails and parks we enjoy with our dogs are adjacent to creeks and reservoirs. dog waste that is not collected gets carried away during rainstorms to nearby waterways, and can be a significant source of pollution. dog waste carries harmful bacteria like E. coli, which poses serious health risks if allowed to come in contact with water.
